1. Introduction

The Log Manager allows you to obtain raw server logs about your site activity and traffic. You can view and/or delete, print, download, and date your log files. You may disable logging altogether to conserve your disk space.

To launch “Log Manager” take the following steps:

1. Log into the Control Panel
2. Select “Websiteos Applications” from the main menu
3. Click on the Log Manager icon located in the sub-menu; the Log Manager welcome screen will display:

4. To launch Log Manager, click “Start.” The application will open in a new window:

Manage Logs

The Log Manager allows you to obtain raw server logs about your site activity and traffic.

Manage your activity logs

You can view and/or delete, download and date your log files. You may disable logging function to conserve disc space. Downloaded server logs can be used with other 3rd party statistics packages.

1.1. Navigation

There is only one way to navigate within Log Manager. You may navigate using the Main Menu.

1.1.1. Main Menu

The main menu is located on the top right corner of Log Manager:

- **Log Manager:** links you to the main page within Log Manager
- **Support:** opens online help files for Log Manager in a new window
- **Feedback:** allows you to send feedback concerning Log Manager

2. Log Manager – Manage yur Activity Logs

In this section you will be able to view, download and remove activity logs. You can view and/or delete, download and date your log files. You may disable logging function to conserve disc space. Downloaded server logs can be used with other 3rd party statistics packages.

4. You will notice that at the bottom of the page the deletion process is pending. Click on "Apply" to finalize the deletion.
 - a. Click "Cancel" to dismiss any changes.

2.4. Disable/Enable Activity Logs

1. To stop monitoring activity logs, click on the "Disable Activity Logs" button.
2. To start monitoring activity logs again, click on the "Enable Activity Logs" button.

2.5. Rotate Activity Logs

If you would like to have your server logs stored according to a specific date, use the Rotate Activity Logs function. This function creates a text file from the activity log, and resets the log. The name of this text file is a combination of the date it is created and words "access log" appended in front of it separated by an underscore.

Example: The activity logs rotated on January 5, 2001 will be saved in a file named:

`access_log_Jan5_2001`

If you rotate your activity log more than once a day, the log's information will be appended to the present day's dated text file.

To rotate your activity log, click the "Rotate Activity Logs" button.

3. Application Changes

Log Manager 3.0 does not contain new functionality compared to version 2.0. The changes in the new version of this application pertain to GUI changes.

The new version has been incorporated into the Accord Framework. The look and feel of this new version has been modified but all functionality found in version 2.0 remains the same in this new version. The screenshots within this document illustrate the GUI changes.

	New functionality	Accord Framework
Log Manager 3.0	NO	YES
